

My Take

Thoughts On Wealth And Happiness

By Ryan Biddulph

Copyright 2010

The past just left town and the future will always stand you up. Live in the present moment.

Think about later and you'll forget about Now.

Think about before and you'll forget about Now.

Watch your " I's ". I am, becomes

Be the person to become the person.

The imagination takes you places where logic can't travel.

Sometimes not thinking or doing is the best course.

Find yourself before looking out for others.

If everybody minded their own business gossip would die.

No news is good news.

The news is primarily death, jealousy, and poverty. And what good does it do you?

If most people agree with you it's probably time to rethink your position.

Who cares what 'they' say?

'They' is a four-letter word.

If 'people' think something you're best off taking the opposing side.

Fighting the flow is like telling God you know better.

Life should be a permanent break.

If someone rubs you the wrong way be thankful. They challenged your belief system.

When you fear rubbing people the wrong way you'll never treat yourself the right way.

You're the first and last you ever.

Trying to be like others is like returning the gift of God in you.

God wants you to be vastly different from everyone else.

Try to fit in. See how far it gets you.

Trying to fit in is a disservice to God.

When you try to be like most others expect similar results.

The more radical your thinking the more you're onto something.

Don't hold back.

Ignore the ego's shouting. Listen to the whispers.

You'll never be misled by listening to the whispers.

Act on an idea before it reaches its shelf-life.

An unconventional approach is a good starting point.

Radically different ideas are the beginning of all fortunes.

You can't live in luxury by thinking about poverty all day.

A great way to lose money is to criticize wealthy people.

Celebrate other's wealth and you'll become wealthier.

A world-changing idea is ready for you every moment.

Gratitude is a conduit to Good.

All circumstances brought you to the present moment. That makes them good.

If it happened, it's good.

Taking the negative is the best way to move backwards.

Nature doesn't know regression. Only humans do.

Blockages are bundles of misinformation.

Continue to be the person until you become the person.

When things look terrible the best things are happening behind the scenes.

Develop faith by ignoring appearances.

Don't validate your efforts by judging appearances. If it feels like it's working, it's working.

Force always negates.

You'll get your best ideas not by thinking about them but waiting for them.

Your best work won't feel like work.

When in the flow let go.

Resistance is an imagination gone wild.

The subconscious does whatever you tell it to do.

Repeat an idea until you believe it.

Life follows your predominant thoughts.

Inspiration is tapping into God.

Inspiration is God acting through you.

Pursued ideas are good ideas.

When you believe in something, that something becomes real.

Don't look to others for approval. You'll never be good enough.

Miraculous results are not the product of logical thinking.

The imagination is where it all happens.

If you see it, it's been imagined.

If you see it, it was once a thought.

Thought is the starting point of all creation.

Don't think too much or too little.

Lack of inspiration creates too much perspiration.

Try too hard and you'll have to try even harder.

Force creates more force.

Forcing things makes things harder on you.

Every achievement must pass the persistence test.

Busy work brings more busy work.

Killing time is killing life.

If your goal in life is to keep busy you're not living.

If your goal in life is to devote 45 years to someone else's definite major purpose you're not living.

Thinking about your goals before others is not selfish.

Be the best you so you can be best for others.

Kill stress with creation. This moves the attention from 'how can I do this' to 'how can I help.'

Self-improvement is the first step towards creating a better world.

You need to improve yourself before you can improve your life.

People will readily help someone who knows what direction they're headed in.

Have goal in mind or engage in aimless activity.

Without a goal in mind why are you doing what you're doing?

Don't seek to be a leader or follower. Be you.

The good and the bad exist in everything. What do you choose to see?

Judgement causes misery.

If it happened, it's good.

Everything is a vehicle for your progression.

God turns to Good what you judge to be bad.

The universe is inherently perfect. What you view as bad is an error in your thinking.

People are the only creatures who believe in the concept of regression.

Think forward.

Creativity is perfecting your craft.

Fighting is a waste of energy.

Watch your “I’s”. I am, becomes.

Thinking is the origin of your life experience. Choose your thoughts with care.

Negative people strangle ambitions more than anything else.

Don’t let those around you control your life.

When stressed, create. God takes care of those who take care of others.

Don’t fight the flow. Let go.

In a hard work world allowing is the most difficult concept to master.

You can never do too much creating.

You can never do too little competing.

When inspired, let the universe finish its work.

On Inspiration - When the universe is speaking through you, don’t cover its mouth.

You are a vessel for God’s activity.

God speaks through everything.

You can’t force inspiration.

When desperation sets in, know that you’ve stopped listening to God.

Inspiration action causes positive attraction.

Whatever you do best is what God placed you here for.

Don’t go through life with a definite minor purpose.

Hobbies aren't meant to be hobbies.

Dreams don't need to be chased. Allow them to come to fruition.

You attract your life experience.

Don't fight the universe. It's your friend.

Mastering the art of allowing means that all action is inspired.

Feeling good makes you a magnet to good.

You'll attract whatever you want until you think about what you don't want.

Fighting the flow is like telling the universe that you know better.

The more you create for others the more the universe creates for you.

Add value, receive value.

On Forcing - Reaching out for something already within your grasp is wasted energy.

Allow is moving downstream.

Forcing is moving upstream.

Everything you want should be attained with ease.

Life was meant to be a vacation. All disharmony is our creation.

Getting the most out of the moment allows you to get the most out of life.

Everything you want is already yours. If you haven't received it you must be getting in the way.

Start now. It's the only way you'll acquire the tools of your trade.

Planning to become a millionaire does not make you a millionaire.

World changing ideas are knocking on your mind's door.

Inspiration is the product of a vivid imagination.

The thought-image precedes the thing.

If you imagined it, you have it.

It will come to you when you get out of the way.

Every good thing is on its way to you.

The universe continually brings what's best for you. Learn how to receive.

Receiving is as important as giving.

There's no nobility in being a poor receiver.

Turn down benevolence and the universe will keep it from you.

Bless your money. That which is blessed increases.

Whatever you appreciate, appreciates.

An appreciation list tells the universe to send more prosperity.

Whatever you want desires to make its way to you.

The universe only knows ease.

The effortless way works best.

An attachment turns limitless possibilities into one.

Meditation opens you to everything.

Holding your vision creates new realities. Using your sight alone perpetuates the same reality.

The imagination is a predictive creative faculty.

Visualize early and often.

Life becomes how you choose your feelings.

You are a magnet.

Each emotion creates a new reality for you.

You are an energy magnet.

Don't let others turn your inspiration into desperation.

Whatever you need to do or have to do is not what you want to do.

All achievement has its origin in desire.

A setback is a push forward.

A lesson resides in each moment.

The master is an eternal student.

A mentor is always learning.

Thinking good thoughts means you're on the right track.

It's more important to learn than to be educated.

Life teaches.

A master learns something every hour.

Learners are listeners.

Listeners are learners.

Successful living is mastering the art of listening.

Listen to be an excellent learner.

Listen, act, live.

Each creative act betters the whole.

The universe knows only forward.

Progression is the call.

Creation makes the competition irrelevant.

Each act moves you forward.

A negative feeling is a signal to get back on track.

Feelings are the Guide.
